PROJECT (Academic)

Vertelo (Subsidiary of Macquarie Group) (Feb'2026 – May'2026)

- **Objective:** Develop a strategic playbook to deeply penetrate the EV financing ecosystem in India.
- Designed a comprehensive Go-To-Market (GTM) strategy encompassing OEM partnership models, channel distribution to capture high-growth EV segments and financing opportunities.

Credit Card Fraud Detection (Oct'2022 - Nov'2022)

- **Objective:** Conducted a root-cause analysis of fraudulent transactions to identify systemic risk patterns, providing strategic recommendations to reduce financial exposure and improve risk governance for the bank.
- **Key Achievement:** Built a predictive risk model achieving 75% recall, with a projected annual cost saving of \$108,636 validated through a cost-benefit analysis and business impact assessment.
- **Tools & Skills:** Jupyter Notebook (Python), Excel, PPT | Understanding the Data, Data Cleaning, EDA, Data Transformation, Train/Test Data Splitting, Model Building, Model Evaluation, Business Impact, Cost-Benefit Analysis, Machine Learning, Analytical Thinking

Lead Score/Conversion (April'2022 - April'2022)

- **Objective:** Developed a customer segmentation and lead prioritization model to optimize the sales funnel, enabling the sales team to focus outreach efforts on high-conversion prospects for an EdTech platform.
- **Key Achievements:** Potential leads that are likely to convert were identified.
- **Tools & Skills:** Python (jupyter notebook) | Understanding the Data | Data Cleaning, EDA | Data Transformation | Train/Test Data Splitting | Model Building (Machine Learning) | Model Evaluation | Analytical Thinking
